[Email](#) | [My Portfolio](#)

Education:

-Bachelor's degree in Computer Science
Catholic University in Erbil (CUE) - Iraq.
High School Diploma - graduated with 98.83

Languages:

Kurdish: - Native
English: - Excellent
Arabic: - Excellent

Brief Background:

Senior Full Stack Software Engineer with extensive experience architecting, developing, securing, deploying, and scaling enterprise-grade software solutions. Expert in the complete Software Development Life Cycle (SDLC), from product discovery and system architecture to implementation, cybersecurity, deployment, monitoring, and continuous improvement.

Possesses deep expertise in modern frontend engineering, backend systems, cloud infrastructure, DevOps practices, database engineering, software architecture, distributed systems, API ecosystems, application security, and web penetration testing.

Proven ability to transform complex business requirements into secure, scalable, high-performance software products while maintaining engineering excellence, reliability, and exceptional user experience. Experienced in leading technical initiatives, designing mission-critical systems, and delivering production-ready applications used by thousands of users.

Employment History

Mega Academy. 2022 – Present (Present as Penetration Tester for Web)

Location: Online

Job Title: **Senior Full Stack Software Engineer**

My work included:

- Architected and developed enterprise software solutions supporting academic, administrative, and operational functions.
- Led full software lifecycle activities including requirements gathering, architecture design, implementation, testing, deployment, and optimization.
- Designed scalable backend systems and secure API infrastructures serving multiple user roles and business processes.
- Implemented advanced authentication, authorization, and access-control mechanisms.
- Conducted application security assessments and introduced secure development practices across projects.
- Optimized application performance, reducing infrastructure costs while improving reliability and scalability.
- Collaborated directly with leadership and stakeholders to align technology solutions with organizational goals.

Freelance Senior Software Engineer . 2023 – Present

Location: Online

Job Title: **Senior Full Stack Software Engineer.**

My work included:

- Delivered end-to-end software solutions for businesses, startups, educational institutions, and organizations.
- Designed ERP systems, CRM platforms, inventory systems, financial dashboards, business automation tools, and custom web applications.
- Led projects from concept to deployment, including architecture planning, UI/UX design, development, security validation, and production support.
- Performed web penetration testing and security audits to identify and remediate vulnerabilities.
- Integrated cloud services, payment systems, AI services, external APIs, and enterprise software ecosystems.
- Provided technical consulting on architecture modernization, scalability, performance optimization, and security improvement.

Sinjar Academy. 2020 – 2022

Location: Ninewa, Sinjar, Iraq

Job Title: **Full Stack Software Engineer.**

My work included:

- Developed and maintained large-scale educational and management platforms.
- Built modern frontend interfaces focused on usability, accessibility, and performance.
- Engineered backend services, APIs, and database architectures supporting mission-critical operations.
- Integrated third-party platforms and services to automate workflows and improve operational efficiency.

Technical Skills

Software Engineering

- Software Development Life Cycle (SDLC)
- Agile & Scrum Methodologies
- Domain-Driven Design (DDD)
- Design Patterns
- Clean Architecture
- SOLID Principles
- Object-Oriented Design
- Test-Driven Development (TDD)
- Technical Documentation
- Code Review & Mentorship

Frontend Engineering

- HTML5, CSS3, JavaScript (ES6+)
- TypeScript
- React.js
- Next.js
- Vue.js
- Responsive Design
- Progressive Web Applications
- UI/UX Design
- Accessibility Standards
- Frontend Performance Optimization

Database Engineering

- MySQL
- PostgreSQL
- SQL Server
- MongoDB
- Redis
- Database Design
- Query Optimization
- Data Modeling
- High Availability Strategies
- Replication & Performance Tuning

Cybersecurity & Web Security

- Web Application Penetration Testing
- OWASP Top 10
- Secure Software Development
- Vulnerability Assessment
- Security Auditing
- Authentication Security
- Authorization Models
- API Security
- Secure Infrastructure Design
- Incident Analysis

System Architecture

- Enterprise System Design
- Distributed Systems
- Scalability Engineering
- Multi-Tenant Architectures
- API Gateway Design
- Service-Oriented Architecture
- Cloud-Native Applications
- Performance Engineering
- Reliability Engineering

Backend Engineering

- PHP
- Laravel
- Node.js
- Express.js
- Python
- RESTful APIs
- GraphQL
- Authentication & Authorization
- Microservices
- Event-Driven Architecture
- Message Queues

Cloud & DevOps

- AWS
- Docker
- Kubernetes
- CI/CD Pipelines
- Linux Administration
- Nginx
- Apache
- Infrastructure Automation
- Monitoring & Logging
- High Availability Deployment

AI & Intelligent Systems

- OpenAI Integration
- AI-Powered Applications
- Workflow Automation
- Intelligent Agents
- Data Processing Pipelines
- API-Based AI Systems
- AI Product Development

Certificates

- Computer science at Catholic University in Erbil (CUE) .
- Intensive Course at Mega academy .
- Dozens of Udemmy Courses .
